

EXTENSION OF AUTHORISATION FOR MINOR USES (EAMU)

INSTRUCTIONS FOR USE

PPP: Fazor Star (PCS No. 03729)

CROPS: [Indoor & Outdoor crops of: Carrots, Parsnips]

This approval provides for the use of the product **Fazor Star (PCS No. 03729)** in respect of, the crops and situations as listed above, which are extra to those specified on the product label.

The conditions of application outlined below are statutory. They must be complied with when availing of this extension for minor uses.

The instructions provided in this extension for minor uses must be used in conjunction with information provided on the approved product label.

Failure to abide by the conditions of approval specified below or on the product label may constitute a breach of the product approval.

Reference Date: 26.03.2021. [Includes latest changes. This version should be used until updated]

| | |
|------------------------------|-------------------------------|
| <i>Product name:</i> | Fazor Star |
| <i>Active Substance:</i> | Maleic hydrazide |
| <i>Formulation:</i> | 600g/kg WG |
| <i>Authorisation Holder:</i> | UPL Holdings Coöperatief U.A. |
| <i>Marketing Company:</i> | UPL Europe Ltd |
| <i>PCS No:</i> | 03729 |

There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.

User type/Function: Professional Use Only / Growth Regulator.

Application:

| Crop | Max. individual dose | Max. number of applications | Max. total dose | Minimum interval between applications | Latest time of application |
|------------------|----------------------|-----------------------------|-----------------|---------------------------------------|----------------------------|
| Carrot & parsnip | 5.0kg/ha | One per crop | 5.0kg/ha | | 21 days before harvest |

Other specific restrictions:

- (1) To avoid risks to human health & the environment comply with the terms of this approval in conjunction with the directions for use on the product label.
- (2) For any individual crop the maximum total dose refers to the total dose of any product containing the same active ingredient.
- (3) Application may only be made using a tractor mounted/trailed sprayer only in a water volume of 300 - 500 litres water/ha to the full mature crop from growth stage BBCH 49* based on root growth stages (equivalent to when leaves are starting to discolour in the first year of growth)
- (4) Post application no unprotected person should enter the treated area until the application had dried & the area has been well ventilated.
- (5) Application may not occur at times when the public have any access in the vicinity of the area of application.
- (6) This approval extends to professional use only.
- (7) For environmental information refer to the product label but specifically: To protect aquatic organisms respect an unsprayed buffer zone of 1m to surface water bodies from tractor mounted/trailed sprayers. Aim spray away from water.
- (8) For operator protection refer to the product label.
- (9) Adverse effects: Approval holders must immediately submit any new information on the potentially dangerous effects of a product or residues of an active substance contained in a product, on human or animal health, or the environment.

There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.

Advisory information:

This approval relates to the use of Fazor Star as an agricultural/horticultural plant growth regulator for the control of excessive growth on the crops & situations listed above.

IMPORTANT PLEASE NOTE:

Prior to the use of this product, growers should take advice from their crop advisors particularly in relation to the use of this product within an integrated crop management system of production.

There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.
