

CARPOVIRUSINE® EVO2

INSECTICIDE

PCS 04825

A suspension concentrate (SC) formulation containing *Cydia pomonella* Granulosis Virus M (CpGV-M) 1 x 10¹³ GV/l

Risk and Safety Information

Warning

May cause an allergic skin reaction

If medical advice is needed, have product container or label at hand.

Keep out of reach of children.

Avoid breathing spray

Wear protective gloves/protective clothing/eye protection/face protection.

IF ON SKIN: Wash with plenty of soap and water.

If skin irritation or rash occurs: Get medical advice/attention.

Dispose of contents/container to a licensed hazardous-waste disposal contractor or collection site, except for triple rinsed empty clean containers which can be disposed of as non-hazardous waste.

Micro-organisms may have the potential to provoke sensitizing reactions.
10 percent of the mixture consists of ingredients of unknown inhalation toxicity

To avoid risks to human health and the environment, comply with the instructions for use.

NET CONTENTS

CARPOVIRUSINE® EVO2

IMPORTANT INFORMATION FOR USE ONLY AS A HORTICULTURAL INSECTICIDE

Crops	Maximum single dose	Max. n°. of applications	Maximum total dose	Latest time of application
Apple, pear	1 L/ha	3	3L/ha	1 day before harvest

READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE.
FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS

SAFETY PRECAUTIONS

Operator protection

WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS), SUITABLE PROTECTIVE GLOVES AND SUITABLE RESPIRATORY EQUIPMENT* when handling the concentrate or applying the product. *Disposable filtering facepiece respirator to at least EN149 FFP3 or equivalent.

Environmental protection

Do not contaminate water with the product or its container. Do not clean application equipment near surface water. Avoid contamination via drains from farmyards and roads.

Storage and disposal

DO NOT RE-USE CONTAINER for any purpose.
KEEP AWAY FROM FOOD, DRINK AND ANIMAL FEEDINGSTUFFS.
KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place.

DIRECTIONS FOR USE

IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

RESTRICTIONS OR WARNING

Consult processor before using on crops for processing.
CARPOVIRUSINE EVO 2 has been tested on a range of common apple varieties but russeting cannot be ruled out on varieties prone to this problem, e.g. Cox.

RESISTANCE

Total reliance on one pesticide will hasten the development of resistance.
Alternating insecticides with different modes of action and alternative control measures in the planned programme is a recognised anti-resistance strategy. Applying CpGV products with different isolates in alternation within a treatment programme will reduce the possibility of resistance development.
CROP SPECIFIC INFORMATION
Useful control of Codling Moth larvae and reduction in damage to apple and pear.

Application rate: 1 L/ha in 1000 L/ha water.

Maximum number of treatments per year: 3

Pre-Harvest Interval: 1 day

Timing of Applications: GS 71-87

CARPOVIRUSINE EVO 2 may be applied from fruit setting until fruit maturation (GS 71-87), on young larvae for optimal efficacy. Timing of applications should be based on information from pheromone traps and/or specialist advice. Do not apply when rain is expected.

Apply the recommended dose of 1.0 L/ha to full height trees typical of orchards at full canopy density. Where tree height and/or canopy density is reduced, the dose (and water volume) should be adjusted in accordance with an appropriate dose adjustment scheme. Consult your specialist advisor for further information.

MIXING AND SPRAYING

Apply with a foliar spray system, ensuring a uniform spraying. CARPOVIRUSINE EVO 2 only acts by ingestion and does not have any contact activity. Therefore, it is crucial to have very good spray coverage of foliage and fruits. Timing of applications should be based on information from pheromone traps and/or specialist advice. Do not apply when rain is expected.

Storage Conditions

CARPOVIRUSINE EVO 2 must be kept frozen (-18°C) for long period storage (at least 2 years following manufacturing date).
Thaw at least 1 day before the treatment at ambient temperature. CARPOVIRUSINE EVO 2 can be frozen several times.

Out of the freezer, CARPOVIRUSINE EVO 2 can be kept in the refrigerator or cold room (+4°C) for maximum 8 months, or at room temperature for 1 month (not exceeding 25°C).

COMPATIBILITY

Do not apply CARPOVIRUSINE EVO 2 in tank mixture with other pesticides or foliar fertilisers.

This product is to be used only in accordance with the recommendations and instructions given on the labels provided with this pack. Use in any other circumstances is entirely at user's risk.

Conditions of Supply

Seller warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on such labels, only when used in accordance with directions under normal use conditions. It is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or manner of use or application, all of which are beyond the control of the seller. In no case shall seller be liable for consequential, special or indirect damages resulting from the use of handling of this product. All such risks shall be assumed by the buyer. Seller makes no warranties of merchantability or fitness for a particular purpose nor any other express or implied warranty except as stated above.
