READ THE LABEL CAREFULLY BEFORE USE

SCAB 80 WG is a preventative contact fungicide for use on pome fruit, containing 800 g/kg captan. Captan belongs to the phthalimide group of fungicides. They are considered to have a multi-site, non-specific mode of action that disrupts many of the essential processes within the fungal cell.

IMPORTANT INFORMATION

Instruction for use:

FOR PROFESSIONAL USE ONLY AS AN HORTICULTURAL FUNGICIDE				
Crop	Max single dose	Max. no. of applications	Max. total dose	Latest time of application
Apple & Pear	1.88 kg/ha	10	18.8 kg/ha	21 days pre harvest

Specific diseases controlled: Apple scab *Venturia inaequalis*, Canker *Nectria galligena*, Storage rot *Gloeosporium app.*, in apples and pear and *Stemphylium vesicarium* in pear.

Method of application: Tractor mounted/trailed orchard/blast sprayer.

READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS.

The product should not intervene surrounding vegetation.

To protect aquatic organisms respect an unsprayed buffer zone of 25m to surface water bodies.

With regard to the protection of aquatic organism, the usage of products on the land sloping to the surface waters is excluded. Product cannot be applied on these lands even when using buffer zone.

Resistance

To prevent the emergence of resistance, use as per label and alternate with fungicides with different modes of action.

Personal protective equipment for the preparation and cleaning of application equipment

Wear suitable hand and body protection.
Perform spraying only where there is no wind or during gentle breeze, downwind and away from other people.
Entry to the treated field is possible only after 2 days after application.
During work and after, until you take off personal protective equipment and until thorough washing, do not eat, drink or smoke.
If not using one-use protective clothing, wash all PPE thoroughly with water.
Do not use contact lenses during preparation of the application liquid and spraying.
Work with the product is prohibited for pregnant and nursing women and young people.
Work with the product is not suitable for allergic people.

First Aid Measures

General advice: If accidental ingestion, or health problems (e.g., nausea, eye irritation, allergic skin reaction ...), always inform your doctor and provide him with information on the label or leaflet. If the person is unconscious, lay him/her side with the head lower than the rest of the body and the knees slightly bent. Monitor breathing, if necessary, artificial respiration.

Inhalation: If symptoms arise remove from source of exposure to fresh air; seek medical attention if symptoms persist or develop.

Skin contact: Remove contaminated clothes immediately and wash with warm water and soap.

Eye contact: Remove contact lenses, if wearing, and Wash contaminated eyes immediately under flowing water for at least 15 minutes while holding eyelids open. Speed of first aid in case of eye contact is crucial to minimize the consequences. Contaminated contact lenses cannot be reused and must be discarded.

Ingestion: DO NOT induce vomiting. Wash out of mouth immediately with water (only conscious person) Never give anything to mouth to an unconscious person. CALL A DOCTOR IMMEDIATELY and show the original product container, label and/or safety data sheet.

Mixing

Half fill the spray tank with clean water and start agitation. Pour the required quantity of product into the spray tank. Top up the spray tank with water to the required level. Continue agitation until the tank is sprayed out. Spray immediately after mixing. Never prepare more solutions than necessary.

Cleaning of application equipment

All application equipment should be triple rinsed with water or a dilute detergent solution. Care should be taken not to discharge the contaminated washings from application equipment into waste water channels.
Contaminated cleaning liquids should be disposed of safely according to local regulations.
